DocBridge® View
Data Sheet

Display Documents in Any Format

DocBridge View reads and displays single documents or data streams of all common formats. DocBridge View supports all complex mixed-object formats typically used for printing, storage and archiving, in addition to all popular raster formats. Every page loaded into DocBridge View is shown in the same window – even when the documents loaded are in different formats. DocBridge View provides all functions required for the easy displaying and navigation of document pages, such as scrolls, turning and zoom functions and display options such as scale-to-gray and font screening.

> Display of all common document formats in one application

> Support of resource references (overlays, fonts, ...)

> View meta data

> Creation and editing of annotations (highlighting, masking areas, lines, text boxes, ...)

> API available for integration in custom applications

DocBridge®View

Supported Formats

Input Formats

- AFP, PDF, PCL5 & 6, PostScript, PPML, VIPP, VPS, Linemode, LCDS/DJDE, Meta-code/DJDE, Prescribe, XPS, XML, HTML/CSS, XSL-FO, SAP ALF+OTF, SVG, Raster Formats, PC Documents

The full list of supported formats is published in the Compart Matrix on the Compart website (www.compart.com)

Standard Platforms

The following platforms are supported as a standard

- **Operating System:** MS Windows 10

Platforms upon Request

The product is designed to run on the following platforms as well, but a dedicated effort for installation, testing and performance tuning is usually required. Configurations including any of the platforms listed below are supported upon request

- **Operating System:** none

Interfaces to Other Systems

- Read from any file system supported by the operating system

Language Support

- **User Interface:** English, Italian, Portuguese, Spanish, French
- **Documentation:** German, English (online help)

General Provisions

- The feature set available in a given installation may vary depending on the license agreement
- Before upgrading platforms or application software for production, prior integration testing in a non-production environment is recommended
